

Senior Living

Kairos Water's intelligent leak detection, water metering, and temperature & humidity sensor technology helps protect senior living facilities by proactively identifying potential issues and ensuring a comfortable living environment for residents. Our advanced technology helps facilities save money, prevent property damage, and reduce safety hazards and liability, making it a valuable solution for any senior living facility.

PROPERTY COST SAVINGS

Our advanced water metering technology helps senior living facilities track and reduce their water usage, leading to significant cost savings.

DAMAGE PREVENTION

Our intelligent leak detection system uses machine learning to continuously monitor and identify potential issues, helping to prevent costly property damage.

SAFETY & LIABILITY REDUCTION

Our temperature and humidity sensors ensure that the living environment for residents is safe and comfortable, reducing the risk of safety hazards and liability for the facility.

Protects Against :

- Water leaks and property damage
- High water usage and associated costs
- Unsafe or uncomfortable living environment for residents due to temperature and humidity issues
- Safety hazards and liability for the facility

Why Choose Us :

- ✓ Patented asset protection system built for commercial applications.
- ✓ No Kairos customer has filed a water damage claim post-installation.
- ✓ Average 6 month ROI; ROI always achieved within 12 months.
